

# CORROSION SURVEY PROGRAM

## FACILITY EVALUATION FOR COST-EFFECTIVE PLANNING AND PREVENTIVE PROTECTION

Our survey program can help you maximize the potential of your asset investment while minimizing your maintenance coatings costs. Our facility inspectors will evaluate your assets and help you understand current and potential corrosion inside your plants, allowing you to effectively plan maintenance painting and cut long-term costs.

### WHAT WE DO

- Identify assets and organize by plant, area, item and details
- Assess current condition and prioritize based on several factors
- Input collected data, historical information and photos
- Provide reports on condition values, maintenance priority and budgets
- Manage and update program annually or upon project completion

### BENEFITS

- Delivers an asset protection program designed specifically for your facility
- Cuts long-term costs through maintenance overcoat recommendations, taking into account lifecycle goals of the assets
- Maximizes effectiveness of your budget with flexible to multi-year approaches
- Prepares your facility for FSMA audits by assessing potentially problematic coating situations
