

HOW RESINOUS COATINGS COMPLEMENT CHANGING SPACES

We understand the need to act quickly to convert spaces while creating optimal hygienic environments. Our resinous coating experts are on hand to help you specify time-efficient solutions, ensure that compliance is met, and offer unrivaled technical support.

SOLUTIONS FOR A RAPIDLY EVOLVING USE OF SPACE ENVIRONMENT

- Existing sound resinous flooring does not need to be removed
- Finish coats can be matched to accommodate a newly purposed space
- New and existing flooring can be seamlessly transitioned
- Rapid return to service options available
- Low odor coatings
- Resinous wall systems can be applied to existing substrates (drywall, CMU or block)
- Can be designed with aesthetics or function as primary consideration

POST-INSTALLATION BENEFITS OF RESINOUS COATINGS

- Seamless environment
- Chemical resistant properties
- Anti-microbial coatings
- Non-porous surface
- Integral cove increases hygienic properties
